

CARBON WALL

Carbon Craft design is a Hubli based design and material innovation company started in 2019. We are a group of Architects and Engineers developing carbon upcycling products for the world's construction demands to mitigate Air Pollution at scale.

CARBON WALL TILE

For centuries, humans have used walls as a means of defence and protection. From ancient fortifications to modern-day barriers. However, over time, humans have also realized that walls can serve another purpose - as a canvas for artistic expression.

Initially, humans began to decorate their walls with simple designs such as handprints, animal figures, and geometrical shapes. These early forms of wall art were a way to adorn and personalize their living spaces. As civilizations progressed, walls became more complex, and the artistry more sophisticated. Murals were created to depict important events and to communicate ideas and beliefs. In current times, technology and art is fused to create interesting mix media wall art.

Amidst these artistic innovations, where mix media is proving to be a well explored field in the modern art of murling, CarbonCraft brings to you a new medium to explore - Carbon Wall Tiles. These wall tiles can create countless designs, with only three shapes and six shades. Through Carbon Wall Tiles, we would encourage a shift in perspective on art of wall making, and not just the making of wall art.

SCOPE OF IDEA

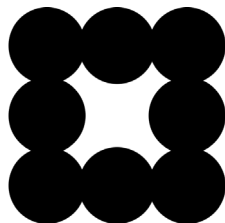

To create a carbon wall, you can assemble the wall tiles into modules that are versatile enough to be assembled into various...

ARRANGEMENTS

and

COMPOSITIONS

This allows for endless creative possibilities, enabling you to customize your wall to your liking and bring your vision to life.

The modularity of the tiles also means that you can easily modify or expand your carbon wall design in the future, making it a flexible and dynamic feature in your space.

EARTH

Earth is one of the five elements of the universe and has been a source of inspiration for many. It symbolizes stability, grounding, and growth, invoking a sense of safety and reliability.

Its presence in a space creates a warm and inviting atmosphere. The earthy-ness evokes a sense of tranquility, making it a popular choice in interior design.

FIRE

Fire has been a significant source of inspiration and is recognized as one of the five elements that constitute the universe. It symbolizes passion, energy, and transformation, invoking a sense of intensity and power.

Its presence in a space creates a sense of dynamism, filled with a sense of vibrancy. Its use in interior design can create a sense of drama and glamour.

AIR

Air has been a source of inspiration and is recognized as one of the five elements that make up the universe. It symbolizes freedom, clarity, and creativity, invoking a sense of openness and lightness.

Its presence in a space creates a sense of simplicity and purity. Its use in interior design can create a sense of spaciousness and modernity.

WATER

Water has served as a source of inspiration for many, being recognized as one of the five elements that make up the universe. It symbolizes calmness, purity, and adaptability, invoking a sense of clarity, and flow.

Its presence in a space creates a refreshing atmosphere and its use in interior design can create a sense of elegance.

ETHER

Void is one of the five elements of the universe and has always been a source of inspiration. It symbolizes strength and precision, invoking a sense of focus and discipline.

Its presence in a space creates a sense of sophistication, filled with a sense of minimalism, and refinement. Its use in interior design can create a sense of sleekness.

CALL TO ACTION

Get ready to tile the walls with our new funky collection, as **we invite the artist in you to make your own Carbon Wall.**

Let your creativity run wild and we'll bring it to life together!

Want to become the artist of your own carbon-piece?

We have got you covered!

Download these files to play around with the tiles.

MAINTENANCE AND CARE

Carbon Wall Tiles can last upto 70 years if maintained properly. These are the series of measures for its maintenance and care.

LAYING: There will be dimensional variations both in thickness and right angles as it is handmade. Variations will have to be adjusted accordingly by the mason to attain the desired layout.

APPLICATION: Carbon Tiles are recommended for horizontal and vertical surfaces in indoor spaces. Usage of these tiles in outdoor open areas may lead to a weathered appearance and loss of polish.

CAUTION: These tiles are not recommended for areas where there will be frequent spillage of oil or masalas such as kitchen countertops, and heavy wet areas like bathrooms.

ROUTINE: For daily maintenance, mop with normal water with attention to changing the water often. Please do not use harsh cleaning chemicals.

MORE INFORMATION

Q: How will my custom-made design be implemented?

A: Once the design is finalised and order placed, we will recommend our execution partners to assist with the implementation of your own Carbon Wall. In case you have your own execution team, we will send one of our execution partners to overlook the design implementation for support.

Q: What is the required lead time?

A: Upon confirmation, to use Carbon Wall Tiles on a wall with standard dimensions, the delivery will be done in 30 to 40 days. On walls with exceptional dimensions, the lead time may go up to 60 days.

Q: Will the joint lines be visible once the tiles are laid?

A: Yes, the joint lines will be visible as the tiles are laid in very close vicinity with a 1-2mm gap for the grouting material, which is necessary to keep tiles intact along with the bottom bedding material.

Q: Is it safe to use Carbon Wall Tiles?

A: Yes, it is perfectly safe as it is made of natural materials like marble chips, marble powder and stone dust.
